HMS-CSSA is a non-profit organization operated by volunteers who are full-time postdocs, students or visiting scholars at Harvard Medical School and its affiliated hospitals. We aim to create a platform for networking, cooperation, and career development among our members, hence serving as a bridge for intercultural communication between China and US. This year's event is the 10th annual meeting organized by HMS-CSSA, and **HCLS Annual Symposium** has become more influential and more recognized and appreciated by the HMS Chinese community during the years. Every year, more than 500 people register and attend the one-day-long symposium in person or watch the live broadcast online. Last year, Dr. George Daley, Dean of Harvard Medical School, gave the opening remarks. Last few years' speakers include Lieping Chen, Gordon Freeman, Xiaoliang Sunney Xie, Chuan He, Shirley Liu, Matthew Meyerson, Yang Shi, Hao Wu, Kai Wucherpennig, Tian Xu, Junying Yuan, Feng Zhang, etc.

The 2019 symposium will be equally exciting that Dr. Harvey Lodish, Dr. Yang Shi and Dr. Yongjun Liu etc. have accepted our invitation. We sincerely invite you join us! Your presence will make this year's program more exciting with more impact!
